

This map displays the distribution of data across Indiana's counties for the 2019-2020 school year. The color coding indicates the following categories:

- Yellow:** No Data
- Green:** Low
- Grey:** High

The map shows a clear trend where the northern and central parts of the state are predominantly grey (High) or green (Low), while the southern part is mostly white (No Data). A diagonal band of green runs from the northwest towards the southeast. The southernmost counties are mostly white, with a few yellow counties in the south and southeast.
